

I am one of the listeners of XM radio at home, office and in my car. I am very happy with the range and quality of programs offered by the XM radio which are not provided by the usual radio stations. In particular, I find that the XM instant traffic and weather reports are very useful to me. I am shocked and disappointed that some broadcasters are interested in stopping the XM instant traffic and weather reports. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide this kind of highly popular and useful programming. I see absolutely no reason to deny such an important service to the XM radio listeners.
